SARAVANAN V

DATA ANALYST | ML ENGINEER

ssaro5063@gmail.com | +91-9384544178 | linkedin.com/in/saravanan-v-21298a2a4

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in Python, SQL, Power BI, Excel, and MySQL. Skilled in data cleaning, data transformation, exploratory data analysis (EDA), data visualization, dashboard development, and business intelligence. Experienced in building interactive dashboards, analyzing large datasets, and applying machine learning techniques to generate actionable insights that support data-driven business decisions. Passionate about solving business problems through analytics and continuous learning.

TECHNICAL SKILLS

Programming Languages: Python, SQL
Data Analysis & Visualization: Exploratory Data Analysis (EDA), Data Cleaning, Data Transformation, Data Visualization, Dashboard Development, KPI Analysis, Business Insights, Statistical Analysis
Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn
Business Intelligence: Microsoft Power BI, Microsoft Excel, DAX, Power Query, Data Modeling
Database: MySQL, Oracle SQL, Snowflake
Development Tools: Git, GitHub, Jupyter Notebook, Visual Studio Code
Machine Learning: Supervised Learning, Unsupervised Learning, Classification, Regression, Model Evaluation Metrics

PROFESSIONAL EXPERIENCE

Training Trains Software Technologies — Data Analytics Intern **Jul–Aug 2025**

Location: Mullamparappu, Erode

- Completed a Data Analytics internship training program covering the fundamental concepts of data analytics.
- Gained foundational understanding of core data analytics principles, including data analysis, data cleaning, data visualization, and exploratory data analysis (EDA).
- Developed a working knowledge of basic business insight generation as part of the Data Analytics training curriculum.

PySpiders — Data Science Intern **Apr–Sep 2026**

Location: BTM, Bangalore

- Engineered and validated structured datasets using Python, Pandas, and NumPy, improving data quality and reliability for downstream analytics workflows.
- Performed Exploratory Data Analysis (EDA) on large datasets to identify trends, anomalies, missing values, and business opportunities, informing data-driven decisions.
- Developed and validated multiple machine learning models using Scikit-learn, comparing algorithm performance through cross-validation and hyperparameter tuning (GridSearchCV).
- Collaborating with mentors on real-world data science projects, following industry-standard workflows and best practices for reproducibility.

PROJECTS

E-Commerce Product Recommendation System

Tech Stack: *Python, Pandas, Scikit-learn*

- Built a collaborative filtering recommendation system to personalize product suggestions for users.
- Analyzed customer purchase behavior across thousands of transactions to improve recommendation accuracy.
- Applied similarity metrics to optimize recommendation performance and relevance.
- Evaluated multiple machine learning models, improving overall recommendation quality.
- Enhanced user engagement through data-driven, personalized recommendation techniques.

Sales Performance Dashboard

Tech Stack: *Python, SQL, Excel, Power BI*

- Analyzed more than 40,000 sales records to identify revenue trends and business opportunities.
- Performed end-to-end data cleaning and transformation using Python and SQL.
- Developed an interactive Power BI dashboard for real-time business reporting.
- Designed KPIs including Revenue, Profit, Sales Growth, Top Products, and Regional Performance.
- Delivered actionable insights that supported strategic business decision-making.

EDUCATION

Bachelor of Technology, Information Technology **2022 – 2026**

Anna University | CGPA: 7.45 / 10

Relevant Coursework: Data Analysis, Database Management Systems, Machine Learning, Data Structures, Operating Systems, Probability & Statistics

CERTIFICATIONS

- Tata Forage — Data Visualization: Empowering Business with Effective Insights
- Coursera — Step into Data Analysis
